Summary

Full-Stack Developer with Hands on experience building full-stack applications, having integrated 15+ third-party APIs and services across React, Node.js, PostgreSQL, MongoDB, and Supabase projects, with production fintech experience.

Skills

Languages	Java, JavaScript, SQL
Frontend	React.js, Next.js, HTML, CSS, Tailwind CSS
Backend	Node.js, Express.js, REST APIs, WebSockets
Databases & Caching	PostgreSQL, MongoDB, MySQL, Supabase, Redis
Infrastructure	Cloudflare (Workers, DNS, API Proxy), Render, GitHub Actions
Tools & Growth	Git, GitHub, Zustand, Google Analytics, SEO

Experience

Full-Stack Web Development Intern

Feb 2026 – July 2026

Webileapps

Vijayawada, India

- Built full-stack fintech features using TypeScript, Node.js, and React across 2-3 internal platforms, each supporting 3-4 role-based user types handling secure financial data.
- Engineered and integrated multiple microservices for data aggregation and role-based access control, streamlining inter-service communication and reducing redundant API calls.
- Designed relational (PostgreSQL) and NoSQL (MongoDB) schemas for secure auth and session management; used Zustand for state management and Winston logging for audit traceability.

Projects

API Coolie 🍷 | React.js, Node.js, MongoDB, REST API, OpenRouter API | Personal Project

Mar 2026 – July 2026

- Developed a full-stack API scheduler and code-execution platform spanning 40+ REST endpoints, letting users trigger HTTP calls or run JavaScript/Python scripts on custom cron schedules, intervals, or fixed times.
- Created a dynamic header/payload builder with structured key-value input and raw-paste parsing, plus configurable authentication and webhook delivery for external integrations.
- Implemented execution history tracking, live run-status polling, and embeddable status badges, giving users real-time visibility into job health without manual refreshes.
- Integrated the OpenRouter API for automated failure explanations, and managed DNS, API proxying, and SEO via the Cloudflare API for the custom domain (stackinfi.in).

TrackWicket 🍷 | React.js, REST API, OneSignal | Personal Project

Jan 2025 – Feb 2025

- Built a cricket tracking platform using REST APIs and custom web scrapers to aggregate live match scores, series standings, ICC rankings, and player profiles in one place.
- Optimized React state management and data fetching to keep scores updating in real time without full-page re-renders or UI flickering.
- Integrated OneSignal push notifications for match alerts and live updates, improving user engagement with the platform.
- Added SEO optimization and Google Analytics tracking to monitor traffic and improve organic discoverability.

Fourzdeals 🍷 | MERN Stack, Payment Gateway | Personal Project

Mar 2023 – May 2023

- Created a full-stack e-commerce application with separate, role-authenticated portals for sellers and consumers.
- Structured a seller dashboard for inventory management and built secure payment gateway processing with a verification-based, image-supported review system.

Additional Work: Client project – movie booking platform showing live seat availability and booking statistics | Native Android news reader (Kotlin, Guardian API) | Real-time chat/video calling app (WebSockets) | Browser-based HTML game with security hardening | DNS/API-proxy management for personal domains via Cloudflare

Education

B.Tech in Computer Science and Engineering

2022 – 2026

Koneru Lakshmaiah Education Foundation

Guntur, Andhra Pradesh

- CGPA: 9.2 / 10.0
- Relevant Coursework: Data Structures, Algorithms, Database Management, Software Methodology

Certifications

- Wipro TalentNext Certification
- Essentials RPA Professional – Automation Anywhere 🍷
